Your Virtual Assistant for Streamlining SnapLogic Project Documentation

Our virtual assistant automates the time-consuming process of manually creating and maintaining technical documentation for your SnapLogic pipelines. Pete does the job that you hate doing, but you must do it.

Key Features:

- Seamless Access via UI, REST API, or Snaps
- Always fresh, always updated documentation
- CI/CD Compatibility: Streamline & integrate effortlessly
- Visual Brilliance: Autogenerated Process Diagrams at your fingertips
- Portable Insights: Export to PDF anytime, anywhere
- Automated Documentation creation
- Navigate with ease through searchable content

Streamline Workflow
Centralized documentation management.

Save Time
Faster documentation, more time for core tasks.

Improve Accuracy
Minimize manual errors.

Storytelling Agent

Revolutionize your user story creation process and maximize Jira's Potential with AI

Revolutionizing Agile project management, instantly transforming simple tasks, requirements, or a prompt into comprehensive, detail-rich Jira stories

Key Features:

- Time Saver
- Instantly Crafted Stories
- Detail-Rich Output
- Jira Integration

Efficiency Boost

Automating manual story writing frees you to focus on high-level planning and strategy

Team Synergy

Misinterpretations are reduced, minimizing rework

Rapid Development

With stories instantly available, sprints can launch faster

Data-Driven Precision

Continuously optimizing output based on your team's history and current needs
